Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

What is claimed is:

1.   (Original) A method of controlling an electronic device, the method comprising:

receiving a control message that corresponds to a keypad activation;

providing, responsive to the control message, keypad data corresponding to the keypad

activation; and

controlling the electronic device according to the keypad data.

2.   (Original) The method of claim 1 wherein the receiving the control message further

comprises receiving the control message from one of an application internal to the electronic

device and a remote control agent.

3.   (Original) The method of claim 1 wherein the providing keypad data further comprises

converting the control message to the keypad data.

4.   (Original) The method of claim 1 wherein the controlling the electronic device according

to the keypad data further comprises obtaining a confirmation from a user of the electronic

device prior to the controlling according to the keypad data.

5.   (Original) The method of claim 4 wherein the obtaining the confirmation depends on the keypad data.

6.   (Original) The method of claim 1 further comprising sending voiced instructions to a remote agent and wherein the control message is received from the remote agent and is responsive to the sending the voiced instructions.

7.   (Original) The method of claim 6 wherein the control message corresponds to one or more keypad activations that correspond to a conversion of the voiced instructions by the remote agent.

8.   (Original) The method of claim 7 wherein the voiced instructions is a request to modify contents of a memory of the electronic device and the control message further corresponds to keypad activations for modifying the contents according to the voiced instructions.

9.   (Original) The method of claim 7 wherein the electronic device is a communications unit and the voiced instructions corresponds to one of dialing a number, looking up a number in a phone book associated with the communications unit, and sending a text message.

10.   (Original) The method of claim 7 wherein the control message results in a change in one of an operation, a parameter setting, and a database within the electronic device.

11-21 (withdrawn)

Appl. No. 10/608,593
Response to Election/Restrictions of January 14, 2008

22.　(Original) A system for controlling a communications unit, the system comprising:

a controller further comprising a processor and a memory;

the processor for interpreting a control message that corresponds to one or more

keypad activations to provide keypad data; and

a keypad buffer for storing the keypad data;

wherein the processor executes software instructions stored in the memory to control the

communication unit according to the keypad data.

23.　(Original) The system of claim 22 wherein the control message is obtained from one of an

application internal to the communications unit and a remote control agent.

24.　(Original) The system of claim 22 wherein the processor executes the software

instructions to control the communications unit according to the keypad data after requesting and

obtaining a confirmation from a user.

25.　(Original) The system of claim 24 wherein the requesting the confirmation from the user

depends on the keypad data.

26.　(Original) The system of claim 22 wherein the processor executing the software

instructions results in a change in one of an operation, a parameter setting, and a database within

the communications unit.

Appl. No. 10/608,593
Response to Election/Restrictions of January 14, 2008

27.   (Original) The system of claim 26 wherein the processor executing the software

instructions results in one of dialing a number, looking up a number in a phone book associated

with the communications unit, and sending a text message.
